RE: Third Follow-Up Review of 2000 First Quarter Water Monitoring, Andalex Resources, Inc., Centennial Project, [REDACTED] Q00-1b

Earlier reviews of the required quarterly monitoring by Senior Reclamation Specialist Jim Smith indicated no data had been received. This is a follow-up to those reviews.

As of October 23, 2000, first quarter 2000 data was finally submitted to the Division. Both MRP and DMR sites were received. A review of the required parameters was conducted and determined that irregularities include a bad field pH and questionable field Sp. Conductance at S18-1, and questionable field pH and bad field Sp. Conductance at Well #1. This observation is based on available data from first quarter 1999 through second quarter 2000. Although six quarters were reviewed, only three sets of data were available for sites S18-1 and Well #1.

A field visit with the operator will be conducted on December 22, 2000, to discuss the irregularities.
